Xeko - Eco-child's Play

With mission-based games *Madagascar* or *Costa Rica*, kids can have incredible fun and learn to keep our eco-system in balance, challenging each other to score the most eco-points in order to win. Parent company, Matter Group, practices the 3-R's (reduce, reuse, recycle) in the creation of their wonderfully designed game materials and packaging. And Xeko connects to [Conservation International](#) in both developing the card game, as well as donating 4% of net sales to support CI's work in 44 hotspots around the world. Recommended for players 8-11 yrs. To demo the games, or discover your alter-eco, visit xekogame.com
